2.22 **GEO-A-CC-5-11-P** – Research Methodology and Fieldwork Lab ✧ 30 Marks / 2 Credits

Every student needs to participate in fieldwork and prepare a **field report** according to the following guideline, failing which he/she will not be evaluated for GEO-A-CC-5-11-P.

1. Each student will prepare a report based on primary data collected from field survey and secondary data collected from different sources.
2. Students will select either one rural area (*mouza*) or an urban area (municipal ward) for the study, with the primary objective of evaluating the relation between physical and cultural landscape.
3. A specific problem or a special feature should be identified based on which, the study area will be selected.
4. The report should be handwritten in English on A4 size paper in candidate's own words within 5,000 words (Introductory Chapter: 1000 words; Physical Aspects: 1500 words; Socio-economic Aspects: 1500 words; Concluding Chapter: 500 words, approximately) excluding tables, photographs, maps, diagrams, references and appendices.
5. Photographs, maps and diagrams should not exceed 15 pages.
6. A copy of the bound report, duly signed by the concerned teacher, will be submitted during examination.
7. The field work and post-field work will include:
 - a. Collection of primary data on physical aspects (relief and soil) of the study area. Students should use survey instruments like prismatic compass, dumpy level, Abney level or clinometer wherever necessary.
 - b. Collection of soil samples from different land cover land use regions of the study area for determining pH and NPK values with help of a soil kit.
 - c. Collection of socio economic data, at the household level (with the help of a questionnaire) in the selected study area.
 - d. Plot to plot land use survey for preparation of a land use map, covering whole or part of the selected area.
 - e. Visit to different organisations and departments for collection of secondary data.
 - f. Any other survey relevant to the objective of the study.
8. The Field Report should contain the following sections (a–e).
 - a. Introduction: Study area extent and space relations, reasons for selection of the study area on the basis of a specific problem or special feature, objectives, methods of data collection, analyses and presentation, sources of information, etc.
 - b. Physical aspects: Lithology and geological structure, relief, slope, drainage, climate, soil, vegetation, environmental issues, proneness to natural hazards, etc.
 - c. Socio-economic aspects:
 - i. Population attributes: number, sex ratio, literacy, occupational structure, ethnic and religious composition, language, per capita income, etc.
 - ii. Settlement characteristics: Number of houses, building materials, number and size of rooms, amenities, etc.
 - iii. Agriculture: General land use, crop-combination, use of fertiliser and irrigational facilities, production and marketing etc.
 - iv. Other economic activities: Fishing, horticulture, brick-making, household and other industries, etc.

Principal
Government Girls' General
Degree College
Kolkata

HONOURS COURSE: CORE SUBJECTS

- d. Conclusions: Relation between physical and cultural landscape. Evaluation of problems and prospects. General recommendations.
 - e. Bibliography.
9. The students will prepare (i) a chorochromatic land use land cover map on the basis of plot to plot survey; (ii) a profile of 250–1000 m, surveyed and plotted, with different land use land cover superimposed on it.
 10. All sections of the report should contain relevant maps, diagrams and photographs using primary and secondary data, clearly citing sources.
 11. All surveys should pertain to the objective of the study. Surveys not relevant for establishing the relation between physical and cultural landscape should be avoided.
 12. Marks division: 20 on report + 10 on viva-voce = 30

2.28 GEO-A-CC-6-14-P – Hazard Management Lab ✧ 30 Marks / 2 Credits

A Group **Project Report** is to be prepared and submitted based on any one case study among the following hazards from West Bengal, incorporating a preparedness plan, preferably in the vicinity of the candidates' institution / district:

1. Earthquake
2. Landslide
3. Land subsidence
4. Thunderstorm
5. Flood
6. Riverbank / coastal erosion
7. Fire
8. Industrial accident
9. Road / Railway accident
10. Structural collapse
11. Environmental Pollution
12. Biohazard

One case study will be done by a group of five to ten students. Different groups may choose different case studies from any one or different types of disasters. The report should be prepared on secondary data and handwritten on A4 page in candidates' own words not exceeding 2,000 words excluding references. The report should contain a proper title. The report should incorporate relevant tables, maps, diagrams and references, not exceeding ten pages. Photographs are optional and should not exceed three. A copy of the stapled / spiral-bound report in a transparent cover, duly signed by the concerned teacher, will be submitted during examination. Without the report the candidates will not be evaluated for GEO-A-CC-6-14-P.

Marks division: 20 on report + 10 on viva-voce = 30

Syllabus for Ability Enhancement Compulsory Course-2 (AECC-2) in

Environmental Studies

Semester-2

Total Marks-100(Credit -2)

(50 Theory-MCQ type + 30 Project + 10 Internal Assessment + 10 Attendance)

[Marks obtained in this course will be taken to calculate SGPA & CGPA]

Theory

Unit 1 Introduction to environmental studies	2 lectures
<ul style="list-style-type: none">•Multidisciplinary nature of environmental studies;•Scope and importance; Concept of sustainability and sustainable development.	
Unit 2 Ecology and Ecosystems	6 lectures
<ul style="list-style-type: none">•Concept of ecology and ecosystem, Structure and function of ecosystem; Energy flow in an ecosystem; food chains, food webs; Basic concept of population and community ecology; ecological succession.•Characteristic features of the following:<ol style="list-style-type: none">a) Forest ecosystemb) Grassland ecosystemc) Desert ecosystemd) Aquatic ecosystems (ponds, streams, lakes, wetlands, rivers, oceans, estuaries)	
Unit 3 Natural Resources	8 lectures
<ul style="list-style-type: none">• Concept of Renewable and Non-renewable resources• Land resources and land use change; Land degradation, soil erosion and desertification.•Deforestation: Causes, consequences and remedial measures•Water: Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter-state).•Energy resources: Environmental impacts of energy generation, use of alternative and nonconventional energy sources, growing energy needs.	
Unit 4 Biodiversity and Conservation	8 lectures
<ul style="list-style-type: none">•Levels of biological diversity: genetic, species and ecosystem diversity;• Biogeographic zones of India; Biodiversity patterns and global biodiversity hot spots•India as a mega-biodiversity nation; Endangered and endemic species of India•Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions;•Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.•Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value.	
Unit 5 Environmental Pollution	8 lectures
<ul style="list-style-type: none">• Environmental pollution: concepts and types,• Air, water, soil, noise and marine pollution- causes, effects and controls• Concept of hazards waste and human health risks• Solid waste management: Control measures of Municipal, biomedical and e-waste.	

Principal
Government Girls' General
Degree College
Kolkata

Unit 6 Environmental Policies and Practices	7 lectures
<ul style="list-style-type: none"> •Climate change, global warming, ozone layer depletion, acid rain and their impacts on human communities and agriculture •Environment Laws: Wildlife Protection Act; Forest Conservation Act. Water (Prevention and control of Pollution) Act; Air (Prevention & Control of Pollution) Act; Environment Protection Act; Biodiversity Act. •International agreements: Montreal Protocol, Kyoto protocol and climate negotiations; Convention on Biological Diversity (CBD). •Protected area network, tribal populations and rights, and human wildlife conflicts in Indian context. 	
Unit 7 Human Communities and the Environment	6 lectures
<ul style="list-style-type: none"> •Human population growth: Impacts on environment, human health and welfare. •Case studies on Resettlement and rehabilitation. • Environmental Disaster: Natural Disasters-floods, earthquake, cyclones, tsunami and landslides; Manmade Disaster- Bhopal and Chernobyl. •Environmental movements: Bishnois, Chipko, Silent valley, Big dam movements. •Environmental ethics: Role of gender and cultures in environmental conservation. •Environmental education and public awareness 	
Project/ Field work	Equal to 5 lectures
<ul style="list-style-type: none"> •Visit to an area to document environmental assets: Natural resources/flora/fauna, etc. •Visit to a local polluted site-Urban/Rural/Industrial/Agricultural. •Study of common plants, insects, fish, birds, mammals and basic principles of identification. •Study of ecosystems-pond, river, wetland, forest, estuary and agro ecosystem. 	
Total	50 Lectures

"Analysing the Discrimination of Gays Men in Society"

"A Sociological Study"

•Chapter 1

INTRODUCTION

To know about the topic accurately firstly we need to know what does the word 'Gay' mean?

Homosexuality Refers to the attraction between two people who are of the same sex. It comes from the Greek word 'Homos' meaning 'the same.'

It is a sexual orientation, as opposed to a gender identity such as male. People who are homosexual may refer to themselves as Gay. There is no one way to experience same-sex attraction. Many people who are gay develop feelings for people of the same sex in their teenage years. However, it can take some time to find what you're most attracted to or to be comfortable in acknowledging it to yourself and others. People experience sexual, romantic, and emotional feelings toward another person in different ways at different points in their lives.

There is a lot of homophobias in the United States and around the world. In many countries, it is illegal to be Gay. People who are anti-gay have spread several harmful myths demonising homosexuality.

What does the word discrimination mean?

The word 'Discrimination' is unfairly treating a person or a group of people against their sex preferences or other aspects. Discrimination can badly affect the society spreading negativity among beings. These negative beliefs can affect the physical and mental health of a person of the gender Gay and their partners too.

Focusing on the core of the topic.

The word 'Gay' is often heard typically when people use this phrase, they are using "gay" as a synonym for something bad, negative, or less desirable. The use of this phrase communicates or perpetuates the prevailing societal view that being gay is less desirable and/ or that you may not be supportive of LGBTIQ+ people.

Gays are looked down upon for the reason that nor are Gays considered a man nor a woman in society they are referred to something in between but is that the right thing? Shouldn't Gays be referred as a separate gender with equal respect and dignity? If we start questioning it is never ending out of my personal experience with knowing a lot of Gays I have realised that Gays have the normal structure meaning socially sanctioned like a man but have feelings for another man which makes them different but do not even have

CHAPTER 1: INTRODUCTION

1.1: BACKGROUND OF THE STUDY

Concept of women Entrepreneurs:

Women entrepreneurship has long been associated with concepts such as women empowerment and emancipation. Increasingly, it has also been marketed as crucial for increasing the quality of life of women in the developing world. Further, it has also been encouraged as way of making changes to the status-quo of women in the Muslim world and re-addressing the balance of power within the family unit. The benefits of women entrepreneurship are many and varied and have been researched in great detail in the past. The purpose of this research is to facilitate a discussion on how best to empower women using entrepreneurship. This will in turn help in the marketing of entrepreneurship as a tool for the female empowerment and emancipation.

Women constitute almost 50 per cent of the world population. So the socio-economic participation of women at the international, regional, national and local levels means using significant potential resources more effectively. Moreover, it is noticeable that entrepreneurship development and empowerment are complementary to each other. Women empowerment depends on taking part in various development activities. In other words, the involvement of women in various entrepreneurial activities has empowered them in social, economic, culture and other related fields. It can be understood that women entrepreneurs have been making significant impact in all segments of the economy in the developed countries like Canada, United kingdom, Germany, Australia and the united states, etc.,

EDUCATIONAL FIELD TRIP DETAILS
SESSION 2022-2023

DEPARTMENT OF GEOGRAPHY

Objective of the Educational field trip conducted by the Dept. of Geography

The major objective of conducting an Educational Excursion and field trip for students is to enhance the experiential and contextual learning.

Field trips enable students to learn and experience the real world situations. Teaching - learning process gets completed when experiences with fun are gained from educational tours and excursions. These trips are arranged in such a way as to facilitate the students to know and understand the real, multicultural world in the best possible ways.

Students perform a host of activities in the Educational field in the subject following the syllabus recommended in the UG course under University of Calcutta.

The Department discreetly organizes educational trips to different urban and rural setups in order to make the students understand the man – environment relations/ interactions at different environments.

The Department has arranged field trips in

- ✚ Taki – a river side town in Hasnabad Block of North 24 Parganas for the session 2022-2023

Students through field trips achieve a higher level of critical thinking when they evaluate their own learning compared with what they get exposed to, and they are able to modify their knowledge based on their personal experiences. Field trips also offer students and teachers the opportunity to interact outside of the classroom, thus enhancing their bonding with each other and improving their social and life skills.

Expected Outcomes

The students as per their course have to perform a host of activities in pre-field period, during the field study (whether an urban area or in a rural setup) and in the post field phase. In the pre-field part, the students learn how to select a specific area based on a definite problem, the methodology to be followed for the entire study and to sort out different sources of primary and secondary data to be collected to perform the field study.

Each and every field trip starts with the reconnaissance survey of the entire area of study on Day 1 and with subsequent time the students perform detailed instrument survey for measuring relief and slope with the survey instruments like dumpy level, prismatic compass, clinometer etc. The students also perform the entire land use mapping of the area along with soil sample collections from different land-use plots. Further to study the socio-economic conditions of the inhabitants which is an essential part, they perform different kinds of surveys like door to door household survey, market survey, traffic survey, hotel and tourist survey (if the field area selected is a popular tourist spot). These close interactions with the

inhabitants during the interviews enable the students to learn how man interacts with his surrounding environment in the local set up. The problems that the inhabitants face in their day to day life are identified and noted during the surveys.

These activities performed in the field are expected

- to develop expertise in selection of study area based on a specific problem, methodology for studying the area and its characters in detail
- to handle different logistics and other emergencies on field
- to develop skills in photography, surveying mapping and video recording

In the post field works at the time of preparing the detailed field report students learn different quantitative and quantitative techniques of analysis of the data collected from the field, and to draw meaningful conclusions out of the analysis done. Sometimes fruitful measures or solutions are also suggested at the end of the field report after a thorough study and data analysis.

The students also learn how to write a report with proper illustrations of diagrams and maps collected from secondary and primary sources and to present the data in an aesthetic way.

The experiential learning is achieved through educational field trips in different setups in our subject .

PLACE OF VISIT : TAKI MUNICIPALITY , NORTH 24 PARGANAS, WB

Three Days Educational Trip to Taki , North 24 Parganas 24 Parganas, West Bengal :

As part of syllabus curriculum in Practical Paper of Semester V (CBCS) system in Geography under University of Calcutta, an educational field trip was arranged in an urban setup at Taki Municipality in North 24 Parganas District from 13th of August to 15th of August, 2022 . The town was selected for carrying the man-environment study in the urban environment. Taki is also a very popular tourist spot in West Bengal . All total 12 students from semester 5 of the Department accompanied the faculty member – Dr. Rajashree Dasgupta (Assistant Professor & Head), Suradhuni Ghosh (Assistant Professor) and a non-teaching staff Mr. Kamallesh Mandal to carry out the detailed study. Similar to other field trips here also the students performed a detailed socio-economic household survey, road survey, market survey, hotel survey and tourist survey in the respective locality within the three days stipulated time. They also performed surveying and levelling in open fields to know the undulations and relief of the locale. A detailed landuse map was also prepared and soil samples were collected from different landuse units in. the Town town
